Restoration

GP 100

Ready-to-use paste putty for indoor use.

APPLICATION AREAS

GP 100 is suitable for:

- Render of masonry or plasterboard surfaces
- The treatment of walls and ceilings made of gypsum, concrete or plaster or cement-lime mortars even if in the raw state.

FEATURES

GP 100 is a ready-to-use paste putty for indoor use ideal for rendering masonry or plasterboard surfaces, suitable for the treatment of walls and floors made of gypsum, concrete or plaster or cement-lime mortars, even if in its raw state.

WARNINGS

- Do not add other materials to the ready product.
- Do not apply GP 100 at temperatures below +5 °C. Store the product in a dry place, away from heat and frost.
- Paints and coatings must be applied when the product is completely dry.

INSTRUCTIONS FOR USE

Preparation for use

Thoroughly clean the surface to be treated by completely removing any residue of dust, grease and efflorescence.

Instructions for use

Load the trowel with GP 100 and apply it to the surface. In case of high thickness (over 1.5 mm) it is recommended to fill the surface with several subsequent applications. Paints and coatings must be applied when the product is completely dry.

It is recommended to close the package carefully after partial use and be careful not to pollute the unused product with dry residues or uncleaned tools.
